SUMMARY

Third-year Computer Science student with a solid foundation in Java, OOPS, HTML, CSS, and SQL, actively expanding into full-stack web development using the MERN stack. Built hands-on projects covering expense tracking, blog platforms, and task management — focused on real-world usability and clean code. Eager to contribute to impactful software products, learn from industry professionals.

EDUCATION

BE Computer Science Engineering, Karpagam College of Engineering Present — CGPA: 8.40/10.00
Higher Secondary Education, CSI Girls Hr Sec School 2022

SKILLS

Technical Skills	Java, SQL, DSA, Problem Solving
Web Technologies	HTML, CSS, MongoDB, Express.js, React.js, Node.js
Core Subjects	OOPS, OS, DBMS, Computer Networks

PROJECTS

Expense Tracker — React.js, Node.js, Express.js, MongoDB

- Built a web app to add and track income and expenses with categories and date filters.
- Created basic REST APIs using Node.js and Express.js, with data stored in MongoDB.
- Added login with JWT so each user can only see their own data.

Blog Platform — React.js, Node.js, Express.js, MongoDB

- Built a site where users can sign up, write blog posts, and read posts by category.
- Wrote APIs to create, edit, and delete posts with simple role checks for admin and normal users.
- Added a comment section under each post so readers can leave their thoughts.

Task Management App — React.js, Node.js, Express.js, MongoDB

- Made a task board where users can add tasks and move them between To-Do, In Progress, and Done.
- Used Express.js and MongoDB on the backend to save tasks with priority and deadline fields.
- Managed UI updates using React state so the page doesn't reload on every action.

EXTRA-CURRICULAR ACTIVITIES

- Solved 400+ DSA problems and participated in multiple LeetCode contests.

CERTIFICATIONS

- SQL Certification - HackerRank
- HTML,CSS Certification - HackerRank
